Received 2016 January 15; accepted 2016 January 20; published 2016 February 10

In Equation (3), the zero-point to convert the surface brightness from MJy str⁻¹ to AB mag arcsec⁻² is incorrect. The correct value is 20.472:

$$\mu_{\text{corr}}(\text{AB mag arcsec}^{-2}) = -2.5 \log[I_{\text{corr}}(\text{MJy str}^{-1})] + 20.472 \quad (1)$$

This is just a typo that does not affect the radial profiles nor the integrated magnitudes presented here, which were correctly computed. The complete S⁴G data set released in Muñoz-Mateos et al. (2015) is also not affected by this typo.
